Agile Teams and QA People

Agile Teams and QA People

Key Agile Testing Principles

- Build quality in
- Done means tested
- Testing drives development
- Quality is a team responsibility
- Continuous testing

How to Fail with Agile QA

- “Not enough time” to continuously test
- “Testing debt death spiral”
- Overrunning testing capability
- Slow tests
- Only testers test
- Whole team without enough test skills
- Testing viewed only as the final step

Thoughts? Questions?

Thank You For Attending!
